

HOW TO ACCESS THE SAN GIACOMO SITE

Authorisation for access to semiresidential services at S. Giacomo is the responsibility of the regional Multidimensional Assessment Units (UVM). As also indicated by the Molise Region (see [https://www.asrem.molise .it/lazienda/ladirezione-aziendale/staff-direzionale/uoc-riabilitazione-e-assistenza-centri-residenziali-e-semiresidenziale/](https://www.asrem.molise.it/lazienda/ladirezione-aziendale/staff-direzionale/uoc-riabilitazione-e-assistenza-centri-residenziali-e-semiresidenziale/)) Semi-residential assistance represents a valid alternative solution, if the conditions are met, to hospitalisation.

The person assisted remains, in fact, at home, but spends a few hours of the day in the facility, where a programme is put in place aimed at recovering or maintaining the individual's residual psychophysical abilities. In this way, the family is supported and sustained in its care, while allowing the patient to maintain his or her habits and emotional ties'. The St. James Site, as a semi-residential facility, guarantees social welfare and health services, but also recreational and socialisation.

The placement of an assisted person is therefore assessed and authorised by the UVM of their health district, which also establishes the nature and frequency of the services.

The patient who wishes to be taken in charge by the St. Giacomo Site must therefore obtain an Authorisation - issued by the Multidimensional Assessment Unit - from the ASL to which he belongs, which he must present at the St. Giacomo Site to the Social Worker, together with his contact details for the subsequent communication of the results to be carried out within the Maximum Time of Acceptance of 3 days also established in the Service Charter.

The Site Referent or, in his absence, the Social Worker will inform the Medical Directorate (DM) of the Site, who will assess within the Maximum Time for Acceptance (TMA) the possibility of inclusion in the group in which the patient would be placed.

At the end of this verification, the Assisted Person/Care-giver will be informed of the outcome to the contacts left during the acceptance phase, either for acceptance of the request or for possible rejection due to unavailability.

In the case of acceptance, the patient/Care-giver are summoned on the date and day of admission.

In the case of rejection due to unavailability, the patient/Care-giver may request inclusion in the Waiting List. This List is never binding for the Assisted Person.

In the case of acceptance, the patient/family members are summoned on the date and day of admission.

In the case of rejection due to unavailability, the Assisted Person/Family members may request inclusion in the Waiting List. This List is never binding for the Assisted Person.

Any extensions to the treatment initially defined, where the conditions are met, are requested by the doctor responsible for the patient, countersigned by the Medical Director, and are subject to evaluation and possible extension by the Multidimensional Assessment Unit.

We are at your disposal at our contacts for any doubts or clarifications.
